Store.html

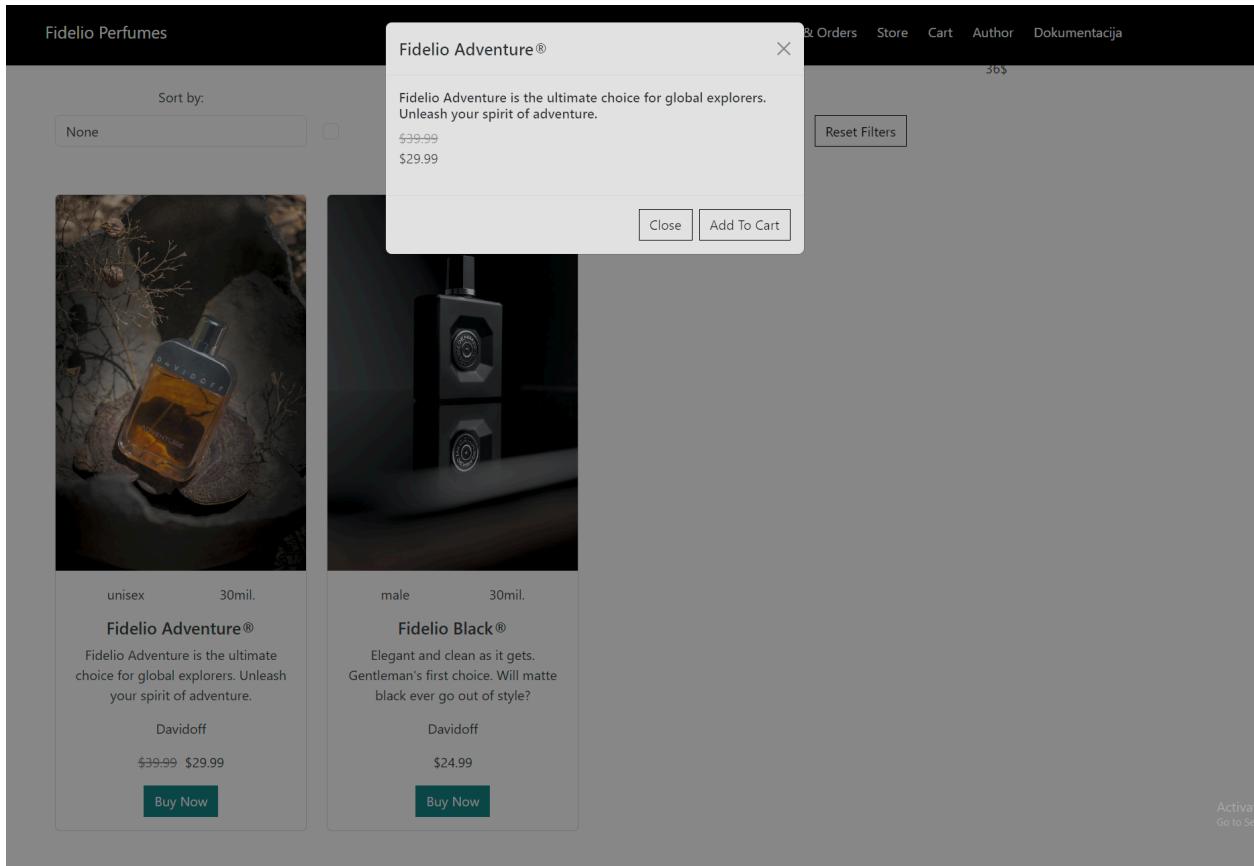

Na stranici store.html nas prvo dočekuje dinamički napravljen baner sa slikama koje se menjaju, učitan iz JSON-a.

Zatim dolazimo do dela gde se prikazuju proizvodi. Imamo opciju da filtriramo i sortiramo proizvode. Filteri se primenjuju na klik na dugme dok se sortiranje odmah izvršava kada se selektuje način sortiranja.

The image displays two screenshots of a web-based perfume search interface. Both screenshots show a header banner with the text "Best Perfumes Are Back In Town" and a subtext "Experience our exquisite collection of perfumes, crafted with care to elevate your senses." Below the banner are four filter categories: Milliliters, Gender, Brand, and Max Price Range. The first screenshot shows the filters set to "All" for all categories. The second screenshot shows the filters set to "30ml" for Milliliters, "Male" for Gender, "All" for Brand, and "36\$" for Max Price Range. Below the filters, there are two rows of perfume bottles. The top row includes a bottle labeled "unisex 30ml.", a bottle labeled "male 30ml.", and two other bottles. The bottom row includes a bottle labeled "unisex 30ml." and a bottle labeled "male 30ml.".

Klikom na Buy Now se otvora modal, koji ima podatke odgovarajućeg proizvoda. Klikom na close ili van modala, on nestaje. Klikom na Add To Cart proizvod se dodaje u korpu i izadje mala potvrda u desnom uglu sajta. Na nju se može kliknuti i tako otići na cart stranicu.

## Cart.html

Nakon dolaska na Cart stranicu možemo videti sve naše proizvode dodate u korpu. Tu se nalaze + i - dugmići za povećanje/smanjenje količine. Ako je količina 1 klikom na - ćemo ukloniti proizvod i korpe potpuno. Ispod se nalazi dugme Go To Checkout koji vodi na Checkout stranicu.

## Checkout.html

Ovde se nalazi, opet, tabelarni prikaz željenih proizvoda i ispod toga forma.

Zatim dolazimo do forme koja klikom na submit provera podatke iz polja koja se popunjavaju, i izbacuje greške ukoliko nešto nije popunjeno kako treba.

Poruke o grešci se mogu videti i kada se izadje iz loše popunjene formе inputa.

Takodje automacki brise SAMO one podatke koji su neispravni. Ako je forma uspešno popunjena pojavljuje se kratka poruka o uspesnosti slanja forme kao potvrda. Tada se svi podaci iz forme automacki brišu.

Poruke o grešci i poruka o uspešnom slanju forme nestaje posle par sekundi nakon pojavljivanja sama od sebe. Takodje poruke o grešci nekog inputa se brišu ukoliko korisnik validno popuni taj input i klikne na submit.
